

## “The Future of Solar Energy is Bright!”

---

### **Biography:** Dr. Alain Joseph, Nova Scotia Community College

Alain Joseph is a Research Scientist responsible for leading Sustainable Energy research, development, and testing at the Nova Scotia Community College. Alain joined NSCC in 2009 as NSCC’s first Post-Doctoral Fellow, and initiated the College’s research programs in the area of Energy Technology Performance Monitoring. Alain is a graduate of Dalhousie University, where he completed an Interdisciplinary PhD focused on Systems Analysis techniques for modelling sustainable energy supply. Alain’s current research is focused on methods of integrating recent advances in energy hardware, software, and data technologies to improve energy management in Atlantic Canada and beyond. Alain oversees the NSCC Applied Energy Research Lab (AERLab) and supervises a variety of college and university student researchers. He enjoys moving ideas from concept to reality by helping solve R&D challenges with local industry.
