

“Fishing for Innovation in the Natural Sciences”

Biography: Mr. Brent Law, Fisheries & Oceans Canada

Brent Law is a Habitat Sedimentologist at the Bedford Institute of Oceanography. He holds a BSc. in Biology and Chemistry, MSc. in Oceanography from Dalhousie University, and is presently completing his PhD in Geological Oceanography at Dalhousie. Areas of interest include the flocculation, deposition, erosion and transport of marine fine-grained sediments and sediment transport modelling. Mr. Law has been funded to lead research projects related to the far field effects of aquaculture (DFO, CIAS, PARR), environmental impacts of offshore oil and gas (PERD), optics and acoustics of sediments in-situ and related modelling (US Office of naval Research), and the erosional and depositional dynamics of tidal flats (US Office of Naval Research, Offshore Energy Environmental Research).
