

“What was that Sound?”

Biography: Mr. Bruce Martin, JASCO Applied Sciences

Bruce Martin is the Applied Sciences Manager for JASCO Applied Sciences in Halifax, NS. Bruce has been developing acoustic data acquisition and analysis systems since 1990. He spent 6 years as a combat systems engineer in the Canadian Navy including 3 years with the sensors group at DRDC. He spent 4 years with MacDonald Dettwiler and Associates where he worked on SOSUS processing systems and 7 years with General Dynamics Canada where he worked on active and passive sonar data processing systems. For the past 7 years at JASCO Bruce has researched the detection and quantification of anthropogenic and biologic sounds. He has been fascinated by underwater acoustics since he discovered he could hear the boat returning for his turn to waterski underwater long before he could hear it in the air!
