

Biography: Mr. Chris Campbell, Marine Renewables Canada

Chris is a marine scientist and leader in development of Canada's ocean economy. With a Bsc from Wales, a PhD from Newfoundland, he has worked in France, Newfoundland and British Columbia.

Trained in biology, he been a leader in research, education and consulting in marine aquaculture, seafood and ocean technology development.

As a founder for this national association, he has built an alliance of industry, governments and utilities to ensure that Canada is a leading player in the emerging renewable ocean energy opportunity. The 100-member Marine Renewables Canada has succeeded in attracting industry, government and utility attention toward this important clean electricity resource and low-carbon economic opportunity.
