

“The Social Life of MRE”

Biography: Ms. Christine Jeans, Stantec Consulting Ltd.

Working for the last 5 years in sustainable community and land use planning has provided Christine with the skills to assess how human beings develop and interact with their environment.

Christine has been with Stantec Consulting Ltd. in our Dartmouth, Nova Scotia office since 2009. Christine has a Bachelor of Community Design, Major in Planning from Dalhousie University. With a strong background and understanding in community planning and land-use planning, she has been involved in Integrated Community Sustainability Plans in Atlantic Canada, Environmental Master Plans and Source Water Protection Plans for a variety of clients. In addition to her planning experience, Christine has coordinated and authored several environmental assessments, environmental protection plans, and baseline studies for both private and public sector clients.

Recently Christine was able to draw on her planning and environmental assessment experience to provide coordination and consultation services for the Offshore Research Energy Association Marine Renewable Energy consultation program for the Cape Breton Strategic Environmental Assessment.
