

“What was that Sound?”

Biography: Ms. Lesa Tanner, WesternGeco

Lesla Tanner is a native Newfoundlander who has been living in Halifax, Nova Scotia for 12 years and has been involved in the oil and gas industry in Atlantic and Eastern Canada for over 22 years.

In her position as Atlantic & Eastern Canada Account Manager, Lesa’s primary role is to assist in the successful execution of seismic programs from the initially bidding to the final report. Lesa is the local industry and regulatory liaison and has extensive experience in all aspects of seismic project management and operations in Canada.

Lesla’s first exposure to the offshore industry was immediately after post-secondary school when she began working with an engineering consortium in the design and construction of the Hibernia’s Gravity Base Structure. Upon Hibernia’s first oil, Lesa joined Schlumberger Canada and shifted her focus to WesternGeco’s seismic activities. 2014 will mark Lesa’s involvement in her 30th seismic program in Canadian waters with some of the world’s most technologically advanced seismic vessels.

Lesla is based in the Schlumberger Canada offices in the Burnside Industrial Park, Dartmouth, Nova Scotia and can be reached via telephone at (902) 468-6474 or via email at LTanner@slb.com.
