

## “Paying the Price”

---

### **Biography:** Mr. Simon De Pietro, DP Energy

SIMON DE PIETRO is an Owner / Director for the DP Energy companies. Simon De Pietro is a graduate of Mechanical Engineering (Aerodynamics and Fluid Mechanics) from the University of Liverpool, England, 1984, with a background in low emissions combustion in gas turbines used for power generation, and 20 years experience in developing wind farms and more recently marine energy projects in Ireland the UK and Canada.

Simon has both analytical and field experience in power generation, initially within the Gas Turbine Industry before moving into Renewables, including on site commissioning experience and field testing worldwide as well as program and project management experience in both a development and a commercial environment.

Within the DP Energy companies Simon has extensive experience of site evaluation, monitoring, landowner negotiations, permitting and project contract negotiations through to the placement of turbine, interconnection, and electrical/civil works contracts.
